Task 3

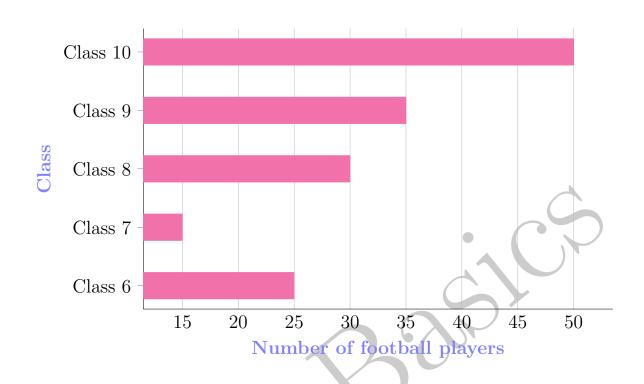

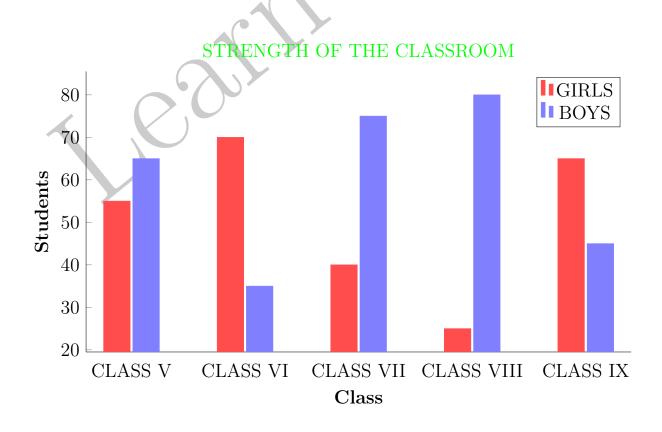

Bar graphs are the pictorial representation of data (generally grouped), in the form of vertical or horizontal rectangular bars, where the length of bars are proportional to the measure of data. They are also known as bar charts. Bar graphs are one of the means of data handling in statistics.

The pictorial representation of grouped data, in the form of vertical or horizontal rectangular bars, where the lengths of the bars are equivalent to the measure of data, are known as bar graphs or bar charts. The bars drawn are of uniform width, and the variable quantity is represented on one of the axes. Also, the measure of the variable is depicted on the other axes. The heights or the lengths of the bars denote the value of the variable, and these graphs are also used to compare certain quantities.

Test Wise Performance

S.No	Topic Name	Performance with Absentees	Performance without Absentees	Attempted	Yet to Attempted
1	Adolescence and puberty	25%	38%	4	2
2	Changes during puberty	31%	50%	4	2
3	Role of hormones	23%	47%	3	3
4	Reproductive phase of humans	28%	56%	3	3
5	Determination of the sex of the baby	33%	67%	3	3
6	Reproductive health	10%	31%	2	4

Concepts need to be revised

- 1. Adolescence and puberty
- 2. Increase in height
- 3. Change in body shape
- 4. Voice change
- 5. Development of mammary glands
- 6. Development of sex organs
- 7. Reaching mental, intellectual maturity
- 8. Secondary sexual characters
- 9. Role of hormones in initiating reproductive function

- 10. Hormones other than sex hormones
- 11. Reproductive phase of life in humans
- 12. How is sex baby determined?
- 13. Boys' changes during adolescence
- 14. Menstrual cycle
- 15. Reproductive health
- 16. Personal hygiene
- 17. Physical exercise
- 18. Say no drugs
